# FOREX

Forex, also known as foreign exchange, FX or currency trading, is a decentralized global market where all the world's currencies trade. The forex market is the largest, most liquid market in the world with an average daily trading volume exceeding \$5 trillion.

All the world's combined stock markets don't even come close to this. But what does that mean to you? Take a closer look at forex trading and you may find some exciting trading opportunities unavailable with other investments.

The background of the slide is a dark blue and black collage. It features several glowing yellow Bitcoin symbols and white Ripple symbols. Overlaid on these are various line graphs and candlestick charts in yellow and white, representing financial data. A large, semi-transparent red 'X' shape is drawn across the left side of the image. In the upper right, there is a red arrow-shaped banner pointing to the left, containing the word 'CRYPTO' in white. Two paragraphs of white text are positioned on the right side of the slide.

# CRYPTO

Crypto trading, or cryptocurrency trading, is simply the exchange of cryptocurrencies. Like in Forex, you can also buy and sell a cryptocurrency for another, like Bitcoin or altcoin for USD and Euro.

This is one way of getting involved in the world of cryptocurrencies without having to mine it.
